

Robotise's mission is to introduce service robots into people's everyday lives. We are a fast-paced and dynamic robotics start-up based in Munich, Germany. We have clients, the right product and prototypes of our service robots already deployed at customer sites. In the process of growing our team of passionate, self-driven individuals, we seek an entrepreneurial minded team member for the role of:

CTO / Roboticist – Munich/Germany

Your Role: The ideal candidate has start-up experience as a CTO or in a similar senior leadership role and has a broad understanding in the development of mobile robotics platforms. He/she has the ability to identify and work with software and hardware specialists. This applicant has a detailed understanding in the field to ensure that a commercially astute technology strategy and roadmap can be developed, executed and maintained.

- Lead agile development efforts of the team who will define, design, develop, deploy and operate mobile robotics based systems
- Select and manage company staff or outsourced vendors
- Communicate the company's technology strategy to investors and clients
- Identify technology trends & consumer behaviors that influence business success
- Implement best practice engineering processes - both hard- and software
- Supervise the quality assurance process, including integration & system testing

Your Profile:

- Previous experience in robotics and/or in building a technology-based start-up firm
- Proven leadership ability, able to inspire both internal and external stakeholders
- Eager to start an entrepreneurial journey in the field of service robotics
- Professional firmware/software (C++/ROS) development experience beneficial
- Ability and passion to lead a team of hard- and software engineers to build amazing robots that drive the next robotics evolution
- Close attention to detail; superior analytical, evaluative, and problem-solving abilities
- University degree in engineering or robotics, PhD and/or MBA on top beneficial
- Fluent English required (oral and written); fluent German beneficial

Your Benefits:

- Company shares and competitive salary package
- Integral and leading part of the senior management team (serial entrepreneurs)
- Opportunity to pioneer in shaping the robotics future
- Joining and shaping a start-up at a very early stage
- Flat hierarchies, a strong team-spirit and regular company events

Location:

- New spacious office at „Campus der Ideen“ (www.neuebalan.de)
- In close proximity to public transport U2/U5, situated near “Ostbahnhof” in Munich
- Swimming pool in front, roof deck, BBQ area, fitness center in opposite building

If you are eager to join a dedicated and passionate team and to become an important part of creating the future of Robotise, please forward your application including your possible start date and salary expectation via e-mail to oliver.stahl@robotise.eu.
