

Robotise's mission is to introduce service robots into people's everyday lives. We are a fast-paced and dynamic robotics start-up based in Munich, Germany. We have clients, the right product and prototypes of our service robots already deployed at customer sites. In the process of growing our team of passionate, self-driven individuals, we seek an entrepreneurial minded team member for the role of:

Lead Software Engineer Robotics (m/f)

Our Search: Are you inspired by innovation? Is problem solving through teamwork in your DNA? Do you like the idea of seeing how your work impacts the bigger picture? Have you built and managed team(s). Answer yes to any of these and you'll fit right in here at Robotise. We are in start-up mode and looking for individuals with strong sense of ownership and drive, coupled with several years of experience in SW development in the field of robotics.

Your Role:

- The lead software engineer will oversee all software developments; manage and own the backlog in close collaboration with the business owners
- Specification, design and development of complex software systems
- Install, configure, test and maintain software and system tools
- Manage cross-platform development in C++ and ROS

Your Profile:

- PhD in Computer Science, Informatics, Math, or other algorithmic-centric disciplines
- Previous experience in robotics with focus on localization and mapping (SLAM), robot control and navigation (local trajectory planning and execution) beneficial!
- Expert level in C++ and object oriented analysis, architecture, agile software develop
- Proven track-record of running teams and meeting deadlines
- A solution-orientated working style and ability to think outside the box
- A highly self-motivated, self-driven team player with a can-do attitude
- Fluent English required (oral and written); fluent German beneficial

Your Benefits:

- Part of the senior leadership team
- Attractive and very fair salary + company shares
- Opportunity to pioneer in shaping the robotics future
- Joining and shaping a start-up at a very early stage
- Expanded responsibilities, flexible working style and freedom in action-taking
- Flat hierarchies, a strong team-spirit and regular company events

Location:

- New spacious office at „Campus der Ideen“ (www.neuebalan.de)
- In close proximity to public transport U2/U5, situated near “Ostbahnhof” in Munich
- Swimming pool in front, roof deck, BBQ area, fitness center in opposite building

If you are eager to join a dedicated and passionate team in order to become an important part of creating the future of Robotise, please forward your application including your possible start date via e-mail to jobs@robotise.eu.
